# FORMING TECHNOLOGIES

WEST-RU Die Division is one of the largest engineering service provider in Eastern Europe for die design, covering

- Draw simulation
- Method planning
- 3D/2D design

for automotive, consumer goods and other industries.

We have a 9-year proven experience in designing over 700 dies.

## SKILLS

- Experienced project managers
- Professional communication with customers executed in different languages:
  - German
  - English
  - Russian
- CAD/CAM:
  - CATIA
  - NX
  - AutoForm

## EXPERIENCE

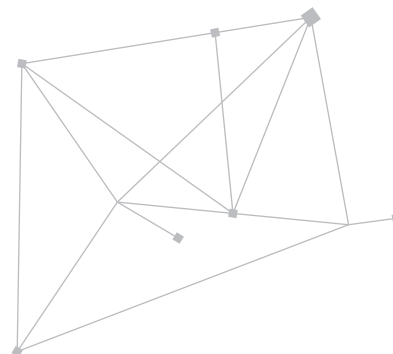

- Implementation of over 160 projects for customers worldwide
- Designed over 700 dies for die stamping in automotive and other industries
- Design of dies sets for:
  - Interior car parts
  - Exterior car parts
  - Structural car parts
  - Parts for non-automotive industry
- High experience in modern technologies of dies
- Internal knowledgebase and large pool of standard solutions

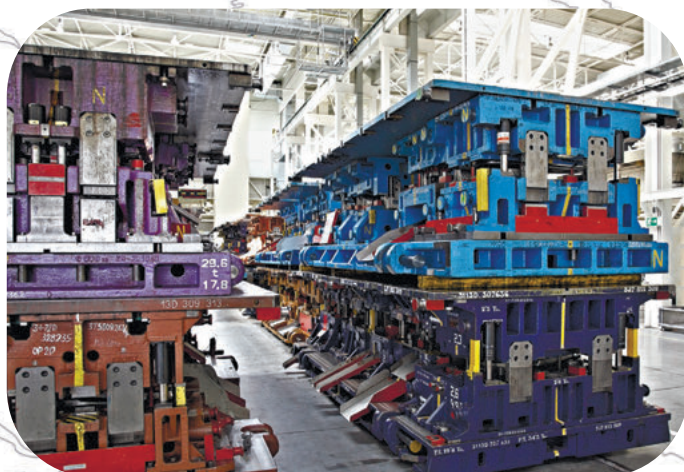

## CAPACITY

- 20 designers
- 3.000 hours per month in design
- 400 hours per month in planning

## BENEFITS

- Deep knowledge of OEMs' standards in stamping based on 160+ projects fulfilled for Brand-Name Automotive and Non-Automotive Customers worldwide
- Quality Management System developed to meet demands of our customers
- Attractive Price/Quality Ratio
- Internal business process adopted and designed to meet foreign customers and partners requirements
- Communication is executed in English and Russian
- Efficient use of modern Internet-based communication tools
- High-quality engineering services

## REFERENCES

Our projects relate to the following OEMs:

- VW
- BMW
- AUDI
- DAIMLER
- FORD
- MAGNA
