# TRANSPORTATION SYSTEMS

WEST-RU Transportation Systems Division is an experienced and long term provider of Detail Engineering and Simulation solutions: 3D planning, design, 2D drawings and documentation in accordance with DIN, ISO and customer's standards.

We have a 15-year proven experience in designing different types of conveyors in process industry:

- belt
- apron
- screw
- chain

Also we have great experience in transportation systems and storage of car bodies for automotive plants.

## SKILLS

- Experienced project managers
- Professional communication with customers executed in different languages:
  - German
  - English
  - Russian
- CAD/Simulation:
  - NX
  - Inventor
  - AutoCad
  - FEA (FEM)

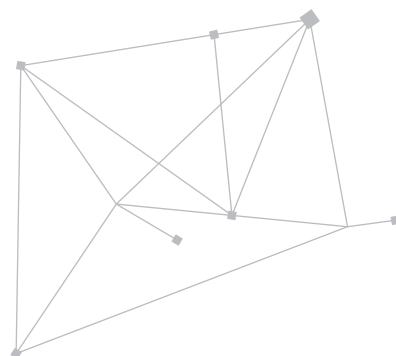

## CAPACITY

- 20 designers
- Over 2.500 hours per month in design

## BENEFITS

- Deep knowledge of DIN, ISO, customer's standards
- Quality Management System developed to meet demands of our customers
- Attractive Price/Quality Ratio
- High-quality engineering services
- Adherence to deadlines

## EXPERIENCE

WEST-RU Transportation Systems Division has a 15-year proven experience in European market

- Over 100 completed projects for process industry
- Over 20 projects for Russian automotive plants
- Internal knowledgebase and large pool of standard solutions
- High experience in modern technologies of transportation systems
